

vision

Our vision

Free from existential fears, children and adolescents all over the world grow up in a familial and social environment that gives them a feeling of security and freedom. Encouraged to think and act independently, they develop their skills and have access to education and qualifications. They make use of their rights and learn to organise their lives on their own as well as to confidently assume responsibility also for others.

mission

Our mission

In close partnership with the worldwide community of the Salesians of Don Bosco, we commit ourselves to supporting disadvantaged children and adolescents from poorer population groups. We support them in developing their physical, mental, and emotional qualities to grow up as independent personalities. The local Salesians let these children experience loving and respectful care, providing them with a comprehensive school and professional education. This way, we enable the girls and boys to escape material poverty, ignorance, and suppression; empowering them to live their lives autonomously and in a socially responsible way, to develop themselves, and to make use of their rights. We understand ourselves as advocates of these young people, we mobilise personal, spiritual, and financial resources for them, and try to spread the enthusiasm for our joint efforts.
